

Electrical heating cable for process temperature maintenance of pipework and vessels in safe or hazardous areas

- Can be cut-to-length.
- Power outputs up to 70W/m.
- Flexible and easy to install.

Constant Wattage Heating Cable

POWERHEAT

- Suitable for use in safe, hazardous and corrosive areas.
- High resistance to chemical attack.
- Full range of controls and accessories available.

DESCRIPTION

Powerheat type PHT is a constant wattage heating cable manufactured in accordance with the latest International Standards. It can be used for freeze protection or process temperature maintenance of pipework and vessels.

It can be cut-to-length at site, and can replace mineral insulated (MI) cables for applications where the cut-to-length feature, or field fabricated heating cable is preferred.

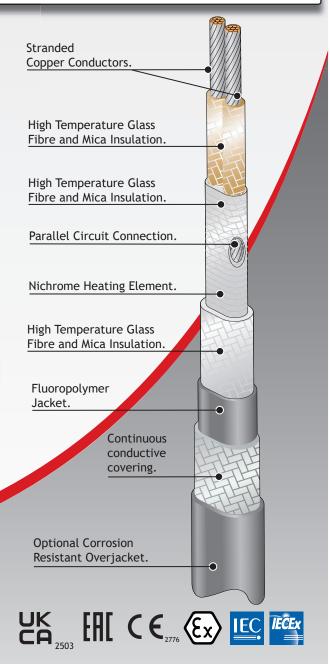

PHT is approved for use in hazardous areas.

The installation of PHT heating cable is quick and simple, and requires no special skills or tools. Termination and power connection components are all provided in convenient kits.

OPTIONS

| PHTN | Nickel Plated Copper braid for non-hazardous areas, hazardous areas (Zone 1 or 2) or where traced equipment does not provide an effective earth path. |
|-------|--|
| PHTNF | Fluoropolymer over jacket |

Fluoropolymer over jacket over nickel plated copper braid provides corrosion protection for braid where chemical solutions or vapours may be present.

SPECIFICATION

| MAXIMUM (TEMPERATL | | | | 285°C (5 | 45°F) | |

| ACCESSORIES Heat Trace supply a complete range of accessories | | | | | | |

Heat Trace supply a complete range of accessories including termination/splice kits, end seals, junction boxes and controls. Such items carry seperate approvals from the heating cable. When used in hazardous areas, only use approved components.

The information given herein, including drawings, illustrations and schematics are intended for illustration purposes only. Heat Trace Ltd makes no warranties as to its accuracy or completeness and disclaims any liability in connection with its use. Users of Heat Trace Ltd products should make their own evaluation to determine the suitability of each such product for specific applications. In no way gwill Heat Trace Ltd be liable for any damages arising out of the misuse, resale or use of the product.

MAXIMUM PIPE/WORKPIECE TEMPERATURES

The surface of the heater must not exceed the maximum withstand temperature of its constructional materials or the Temperature Classification (if installed in a hazardous area). This is ensured by limiting the pipe or workpiece temperature to a safe level either by design calculation (a Stabilised Design) or by means of temperature controls.

For worst case conditions, the temperature of steel pipes should be limited to the following levels:-

| C | atalogue Ref. | Nom Output | Area Classification | | | | | | |
|---|------------------|---------------|------------------------|------------------------|-----|-----|-------------------|-----|-----|
| _ | | (W/m) | Haz | Hazardous ¹ | | | Safe ² | | |
| _ | | | T6 | T5 | T4 | Т3 | T2 | T1 | |
| Ρ | HTN | 10 | 43 | 60 | 100 | 181 | 275 | 275 | 275 |
| | | 30 | - | - | 25 | 114 | 234 | 234 | 234 |
| | | 50 | - | - | - | 49 | 186 | 186 | 186 |
| | | 70 | - | - | - | - | 125 | 125 | 125 |
| Ρ | HTNF | 10 | 39 | 59 | 106 | 186 | 275 | 275 | 275 |
| | | 30 | - | - | 20 | 133 | 243 | 243 | 243 |
| | | 50 | - | - | - | 64 | 201 | 201 | 201 |
| | | 70 | - | - | - | - | 147 | 147 | 147 |

Pipe temperatures higher than those given above may be accommodated by using Heat Trace Ltd voltage compensating devices. Please call for further details.

Tolerances: Voltage +10%; Resistance +10%; - 0%

Notes

- 1 Surface temperature limits in accordance with current standards.
- 2 Surface temperature limited by materials of construction (withstand temperature).

MAXIMUM CIRCUIT LENGTH

| OUTPUT | MAX. CIRCU | T LENGTH* | ZONE LENG | TH (NOM) |
|----------------------|--------------------------|---------------------------|------------------|--|
| (W/m) | 115V | 230V | 115V | 230V |
| 10 30 50 70 | 79m 46m 35m 30m | 152m 88m 68m 56m | Heat represen | your local Trace titive for ails. |

*For $\pm 10\%$ end-to-end power output variation

POWER CONVERSION FACTORS *See note below

| 115V Heating Cable | 230V Heating Cable |
|---|--|
| 277V x output by 5.8 | 277V x output by 1.45 |
| 230V x output by 4.0 | 240V x output by 1.09 |
| 208V x output by 3.27 | 220V x output by 0.91 |
| 120V x output by 1.09 110V x ouput by 0.91 | 208V x output by 0.82 115V x output by 0.25 |

*Maximum power output of cable in hazardous area should not exceed 70W/m. Do not use voltage multiplier if resulting power output exceeds 70W/m.
